AIO TWIN : New Macassar Finish

WWW.TRIANGLEHIFI.COM

AIO TWIN MACASSAR

A new musical essence

TRIANGLE unveils a new finish for its AIO Twin connected speaker, featuring a genuine wood veneer inspired by Macassar ebony, selected for its distinctive grain and timeless elegance.

Equally at home in Art Deco interiors and contemporary living spaces, this distinctive wood creates a true bridge between eras. Much like the Macassar finish itself, the AIO Twin embodies a link between tradition and modernity by bringing together, within a single system, the ritual of vinyl listening and the convenience of digital music..

AN EXCEPTIONAL ESSENCE

More than just a finish, “Macassar” is a material whose richness is revealed over time. Depending on the viewing angle or the light, the contrasts shift, reflections appear, and the wood’s grain offers an ever-changing perspective on the speaker.

Its interpretation on the AIO Twin reveals a vertical grain where fine lines with golden highlights run through a rich, dark brown base, creating a natural contrast of great elegance.

Gabriel®

FABRIC

The AIO Twin's iconic oblong grille is clad in Gabriel fabric in a new deep brown shade. Renowned for their quality and sophistication, the fabrics from this Scandinavian brand complement the warm tones of the wood veneer naturally, while adding a contemporary touch to the overall design.

This combination of wood and textile turns the AIO Twin into a true design object with a decidedly premium feel.

UNCOMPROMISING HIGH FIDELITY

Much like the Macassar finish, which bridges the gap between heritage and modernity, the AIO Twin serves as a link between two ways of enjoying music. It brings together the ritual of playing vinyl with the spontaneity of streaming in a ready-to-use system designed to let you enjoy music with ease.

Compatible with Bluetooth HD and Wi-Fi connectivity, the AIO Twin provides easy access to all your digital music without compromising on sound quality. It can also be paired with other speakers in the AIO ecosystem to stream music throughout multiple rooms in your home and create a true multi-room environment.
