Designed as a large-format bookshelf speaker, the BR05 expands the BOREA range with a retro-chic proposition. It combines the charm of a generous format with a contemporary acoustic design, delivering a wide, natural and lively listening experience.

Developed around a new 21 cm Midwoofer driver, it delivers deep, controlled bass while preserving the musicality that defines the BOREA range. Its 100% natural cellulose pulp cone contributes to warm vocal reproduction and a rich tonal texture.

Designed to fully support the energy of this large-diameter driver, its reinforced cabinet is combined with the DVAS architecture to limit unwanted vibrations and contribute to precise sound reproduction. Its front-firing double bass-reflex port improves bass performance while making the speaker easier to place in the room.

True to the BOREA DNA, the BR05 features the 25 mm silk dome EFS tweeter, ensuring homogeneous high-frequency diffusion and a precise soundstage. It also retains the visual codes of the range, with finishes combining wood cabinets and matching front faces.

The BR05 offers two setup options: placed directly on the floor using the supplied base, or mounted on the dedicated S03 stands. In both configurations, its tilt allows the speakers to be directed towards the listener, optimizing the coherence of the soundstage and listening precision..

With its removable magnetic grilles and retro-chic identity, the BR05 combines contemporary elegance with vintage charm. Capable of filling rooms from 15 to 45 m², it is designed for hi-fi enthusiasts looking for a speaker with a distinctive style, delivering a generous, expressive sound full of character.
