

## RANGE : Accessories

*Developed specifically for the BOREA BR05, the S03 stand positions the speaker in optimal listening conditions. With its compact 40 cm height, it creates a sleek and elegant profile while maintaining the visual lightness of the overall setup.*

Its angled design naturally directs the drivers towards the listening area, helping to create a precise soundstage and a well-focused stereo image for a more immersive listening experience.

Its highly rigid steel structure is built around four tubes, providing excellent mechanical stability while efficiently dissipating unwanted vibrations generated by the speaker. The top plate features a raised rear edge that helps keep the speaker securely in place despite its angled position, while an integrated cable management system ensures a clean and discreet installation.

The S03 is supplied with height-adjustable metal spikes and protective floor discs, as well as TRIANGLE-branded rubber feet. These two solutions make it possible to adapt the decoupling to different types of flooring while ensuring excellent overall stability.

Also compatible with other speakers, including the BOREA BR03 and BR04, the S03 is available in black or white finishes to blend seamlessly into a wide range of setups.
