NEW SPEAKER GARDEN 7

High-fidelity in the air

DURABLE OUTDOOR ENCLOSURE

IP66 certification

The GARDEN 7 is a weatherproof speaker specially designed for outdoor use, whether in a garden, on a patio, near a swimming pool or on a terrace. Its UV-treated polypropylene casing means it can withstand all kinds of weather and stay outside all year round.

IP66 certified, it offers enhanced protection against rain, water splashes and dust. The loudspeakers and all the connectors are protected by insulating walls and ducts, making this a robust speaker that will stand the test of time.

A DIFFUSE SOUND ENVIRONMENT

360° sound

The GARDEN 7 is a passive loudspeaker featuring a two-way coaxial driver fitted with a 25mm polyetherimide (PEI) dome tweeter on a 16cm polypropylene cone. These materials, specially designed for outdoor use, ensure a rich sound and perfect weather resistance.

The drivers are directed towards a cone at the base of the speaker for 360° sound diffusion. This ingenious design guarantees consistent sound quality wherever you are.

The speaker covers a wide frequency range from 63 Hz to 20,000 Hz, delivering energetic, accurate sound for an immersive experience. It offers 60 watts of power handling and a voltage selector for use with all amplifiers on the market.

LIGHTING AMBIENCE

Integrated LED

The GARDEN 7 incorporates LED lighting cleverly placed around the speakers offering a warm and friendly atmosphere around the speaker.

THE GARDEN 7 is fitted with a 12-volt transformer for simple connection to a power line, in addition to the speaker cables.

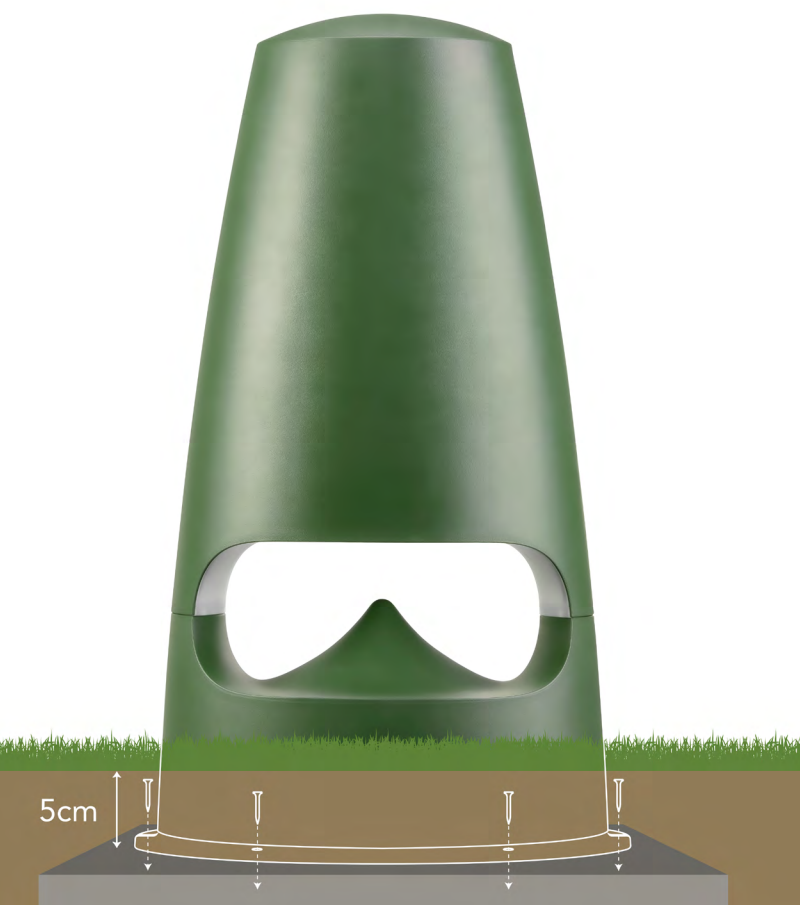

The lighting, powered by a dedicated source, can be activated independently of the music. The speaker thus becomes an elegant light source, even when it is not emitting sound.

IN HARMONY WITH YOUR SURROUNDINGS

Designed for all environments

The GARDEN 7 speaker offers flexible installation and can be set up in any type of environment.

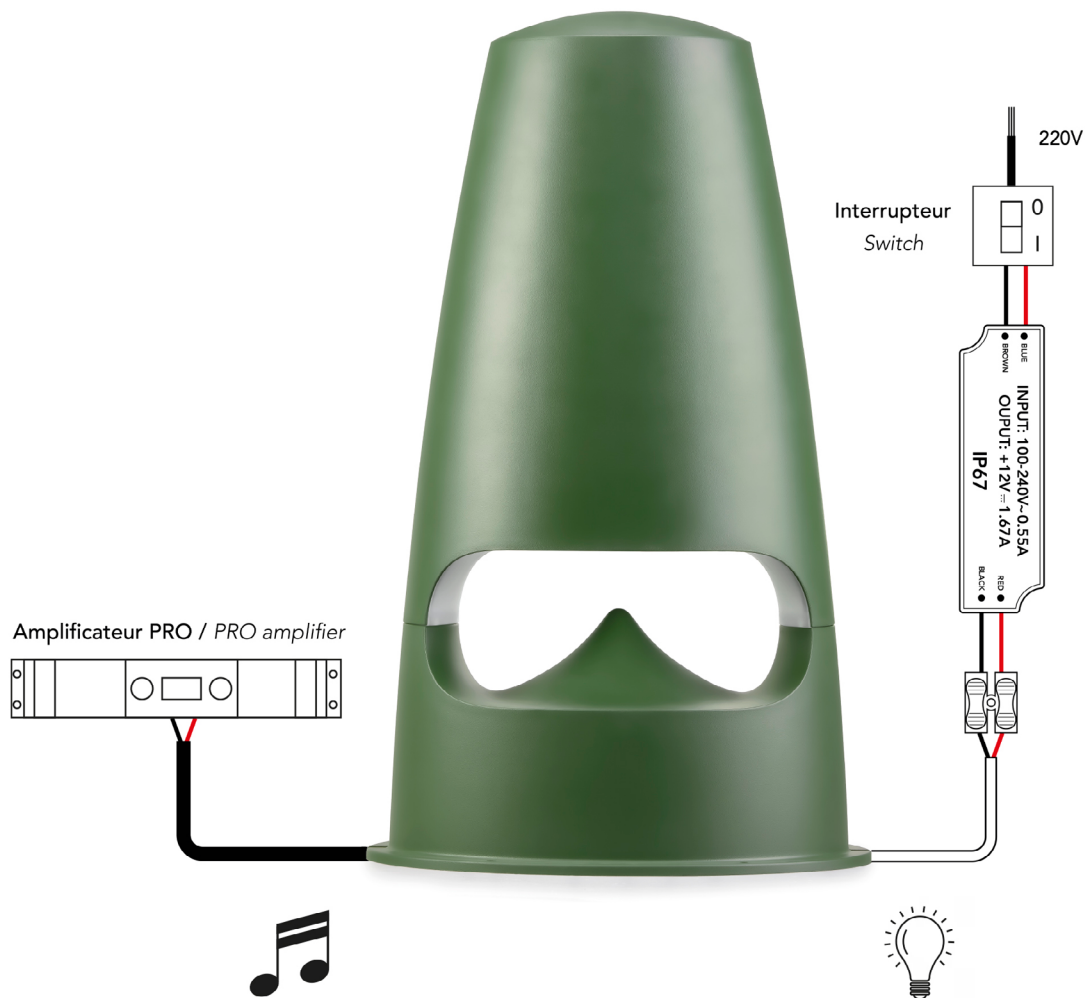

With its sober design and two finishes, green and grey, the GARDEN 7 blends elegantly into a green space, terrace or walking area. It can be semi-buried in the ground, fixed to a concrete or wooden slab, adapting to a wide range of possible layouts.

Whether you choose to install a single speaker, cover the four corners of the pool or create a pathway of sound and light, the GARDEN 7 will meet all your expectations.

SIMPLE INSTALLATION

Connecting this speaker is very simple:

Audio part (black cable)

Simply connect your amplifier to the speaker's terminal block using a standard speaker cable.

The GARDEN 7 is equipped with a voltage and power selector and can be adapted to all installations, depending on your amplification and the number of speakers in your project.

Lighting section (white cable)

The LEDs must be powered by a standard electrical cable that connects to a 12-volt electrical transformer.

You can connect the system to a switch to manage the lighting simply and intuitively and enjoy a bright atmosphere even without music.

PROFESSIONAL AUDIO SOLUTION

For large installations

The GARDEN 7 has been designed to meet the needs of professionals in large-scale installations such as bars, restaurants, hotels, public spaces and shopping centres.

Equipped with a 100V-compatible power selector, it enables signal distribution over long distances and optimised power management, ideal for multi-speaker systems. Thanks to its versatility, it can be connected to a conventional Hi-Fi amplifier or integrated into a centralised distribution system.

TECHNICAL SPECIFICATIONS

GARDEN 7

Public Price	399€ (piece)
Type	Outdoor Speaker IP66
Ways	2
Coaxial Driver	Tweeter : 1" / 25 mm Midwoofer : 6" / 16 cm
Sensibility	86 dB
Bandwith (+/-3dB)	63 Hz - 20 kHz
Power Handling (Watts RMS)	60 W
Min./Max. Impedance (Ohms)	8 Ω
Cabinet dimensions (WxHxD)	330 x 530 x 270 mm
Packaging Dimensions (WxHxD)	340 x 590 x 300 mm
Net Weight Unit	3,8 kg
Gross Weight	4,4 kg
Finishes	Vert : 3660216015235 Gris : 3660216015204
