NEW SUBWOOFERS FOR THE THETIS RANGE

TRIANGLE updates its range of subwoofers with two new models: Thetis 340 and Thetis 300.

NEW THETIS 340 & 300

Triangle, French loudspeaker manufacturer, updates its range of Thetis subwoofers with two new models: Thetis 340 and Thetis 300.

In line with the brand's DNA, these compact subwoofers are versatile and can be used as part of a home theater set-up or as a complement to a stereo system.

Thétis 340 subwoofer- Black Ash

Thétis 300 subwoofer - High Gloss White

Available in 3 finishes: Black Ash, High Gloss Black & High Gloss White, they will blend easily into all types of interiors with sobriety and elegance.

WHAT'S NEW?

Featuring 25cm (Thetis 340) and 20cm (Thetis 300) downward-facing drivers, they allow your set-up to explore the full sound spectrum, making your experience unique and immersive.

BASS-REFLEX CONFIGURATION

The Thetis 340 and 300 operate using a bass-reflex principle, extending their bandwidths even at low volume. With a laminar port, airflow noise is significantly reduced compared to a classic tubular port.

SUCCESSFUL DESIGN

The transducers use composite membranes made of cellulose and carbon, that ensure high rigidity. Combined with oversized engines and controlled suspensions, the speakers have excellent power handling, reproducing all types of dynamics without any difficulty.

Equipped with the latest generation of Class-D amplifiers, the Thetis 340 & 300 respectively have a power of 250W/150W RMS, with a 400W/250W peak power. With steep crossover slopes, matching the Thétis subwoofers to your main speakers is easy.

The design of the cabinets is the result of a thorough vibrations study, conferring the Thetis 340 and 300 a remarkable sound.

OPTIMIZED TECHNOLOGIES

PROVEN COMPATIBILITY

The Thetis subwoofers feature numerous inputs, allowing them to be associated with all types of amplifiers. They include a direct LFE input for home theater set-ups, the settings will then be made from your dedicated amplifier. They also feature standard RCA inputs for Hi-Fi set-ups, and high-level inputs for amplifiers with no suitable output.

You can manually adjust the volume, the phase, and the frequency roll-off for a perfect fit with your main speakers.

COMFORT OF USE

The Thetis subwoofers include a remote control for volume and standby. An LED display on the front panel provides visibility of the sound setting.

To save energy, an automatic standby is enabled after 20 minutes if there is no signal. As soon as a new signal is received, the subwoofer is automatically reactivated.

PRACTICAL INFORMATION

The Thetis 340 & 300 subwoofers are available now, in 3 finishes: High Gloss Black, High Gloss White and Black Ash.
