

THETIS 380

FINISH : BLACK OR WHITE HIGH GLOSS

The most powerful subwoofer in the range, Thetis 380 has a **12-inch (30cm) driver** with a composite membrane, made of cellulose and carbon and a double-coiled motor system giving it an excellent power handling. **Working in a bass reflex configuration** to provide a frequency response ranging between 20 - 120Hz.

A new enclosure has been designed to measure the cabinet distortions in order to avoid unwanted vibrations. The class-D amplifier with **an output of 350 watts RMS (500 W peak)** has been redesigned, ensuring a large energy reserve.

Highly versatile, the Thetis subwoofers feature an **LFE input, an RCA input and other high-level inputs** allowing pairing with any type of amplifier, and also have a **manual frequency roll-off, volume and phase control**. They also include a remote control and an LED indicator on the front panel enabling you to set the volume at the right level according to your listening location.

TECHNICAL SPECIFICATIONS

Type	Bass Reflex
Driver diameter	12"
Phase	0-180°
Bandwidth	20-120 Hz
Amplifier power handling RMS	350 W - Class D
Inputs	LFE, L&R high and low level
Output	High level
Dimensions	14.96 x 14.96 x 16.53"
Unit net weight	42.11 lbs
EAN code (black/white)	3660216005328 / 3660216005335
